SUMMARY

Full Stack Developer skilled in the MERN stack (MongoDB, Express.js, React.js, Node.js), with growing backend experience in Java and Spring Boot. Built and shipped a solo full-stack marketplace application covering authentication, real-time search, and third-party AI integration, and currently building a second full-stack project on Spring Boot + MySQL to strengthen cross-stack range. Comfortable across the stack, from responsive UI to REST API design and database modeling, with 100+ problems practiced on DSA (Arrays, Strings).

EDUCATION

Bachelor of Technology (B.Tech), Computer Science <i>GLA University, Mathura, India</i>	08/2023 – 05/2027
Intermediate (Science Stream) <i>Mother Athena School, Budaun, India</i>	02/2022 – 05/2023
High School (Class X) <i>Mother Athena School, Budaun, India</i>	04/2020 – 05/2021

SKILLS

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Responsive Design

Backend: Node.js, Express.js, REST API Design, Middleware, Routing, Spring Boot (Basic)

Databases: MongoDB, MySQL

Languages: JavaScript, Java (100+ DSA problems solved — Arrays, Strings), SQL

Tools: Git, GitHub, VS Code, JWT Authentication

PROJECTS

MedMarket AI — E-Pharmacy & Virtual Health Assistant (Solo Project) [Live Demo](#) | [Source Code](#)

MERN Stack, Tailwind CSS v4, Groq AI, Razorpay, JWT

- Built a solo, full-stack marketplace where multiple pharmacies list and manage their inventory, and customers can compare real-time prices across verified stores.
- Built a secure checkout flow that re-checks stock and price on the server before payment, with Razorpay integration and signature verification for both COD and online payments.
- Built an order tracking system (Pending to Accepted to Delivered) with cancellation rules, plus a return/refund flow that needs photo proof and vendor approval before stock is restored.
- Built a complaint system where customers and vendors can report issues on an order, with admin-level visibility to review and act on them.
- Used Groq AI to build a bilingual (Hindi/English) symptom checker and drug-interaction checker, using careful prompt design to keep the AI's suggestions safe and accurate.
- Built secure login with three methods (Email/Password, Phone OTP, Google) for three separate dashboards — Customer, Vendor, and Admin — including vendor verification.
- Built a fully responsive UI with React.js and Tailwind CSS, and deployed the app on Vercel with MongoDB Atlas as the database.

HR Management System — AI HR Platform (Solo Project, In Progress) [Source Code](#)

Spring Boot, MySQL, React.js, Tailwind CSS, Groq AI, JWT

- Building a role-based HR system (HR, Employee) with Spring Boot, Spring Security (JWT), and Spring Data JPA on a MySQL database.
- Building core features: employee and department management, attendance tracking, and a leave request/approval flow.
- Using Groq AI (Llama 3.3) to build a resume screener that scores candidates against a job's requirements, and an interview question generator based on each candidate's resume.

PROFESSIONAL EXPERIENCE

JOVAC'25 – Smart Full Stack Program (Trainee), W3Grads

45-day Summer Training Program | 06/2025 – 07/2025

- Practiced full-stack fundamentals — JavaScript, React.js, Node.js, Express.js, and MongoDB — through a mentor-led Generative AI and MERN Stack training program.
- Built and tested REST API endpoints and connected them to a React frontend under structured mentorship.

CERTIFICATES

JOVAC'25 – Smart Full Stack Program, W3Grads — 45-day training (06/2025 – 07/2025); certified in partnership with GLA University.
Leadership and Team Effectiveness (Elite, NPTEL), IIT Roorkee — 12-week course (Jan–Apr 2026).
